Knowledge Article Rules

STORY

As Blake, a KMT Admin, I want to configure what information is mandatory and define rules for knowledge article lifecycles so that I can control who, how, and when knowledge articles are created, revised, and approved or rejected.

ACCEPTANCE CRITERIA
1. While logged in as a KMT Admin, I should be able to configure:
    a. Knowledge articles one by one, by type, and globally
    b. Which fields are mandatory based on the type of knowledge article
    c. The lifecycles for knowledge articles including notification times based on the type of knowledge article
    d. Add, remove, or change user roles and permissions
